

Austrics 24.3

Patch Release Notes

Version 24.3.8

UPDATES & IMPROVEMENTS

Below are the updates and improvements included in the **Austrics 24.3.7** release patch.

Reference	Category	Description	Included as of:
AM-9169	Crew	Fixed an issue with the Duty Schedule Report on Windows so that the <i>UnPaid Value</i> would now allow blank values.	24.3.8
AM-9143	Crew	Fixed an issue where the Crew Optimiser may incorrectly remove the sign-on allowance in a shift, thereby rendering it illegal.	24.3.7
AM-9131	Crew	Fixed an issue where the <i>Display Missing Segments</i> button from specialised Schedule Data Creation screens would not open the file.	24.3.7
AM-9105	Crew	Fixed an issue where in certain situations some run segments would remain uncovered due to them being omitted in the schedule data.	24.3.6
AM-9116	Crew	Fixed an issue whereby the Crew Optimiser may unexpectedly construct a shift with two consecutive activities not in time order.	24.3.6
AM-9043	Crew	Fixed an issue on Windows where the vallow data was not provided to the Crew Optimiser.	24.3.6
AM-9044	Crew	Fixed an issue on Windows where the route knowledge file was not being provided to the Crew Optimiser.	24.3.6
AM-9104	Crew	Corrected an issue where Arrival Passenger Travel details where being omitted from schedule books created by a Crew job.	24.3.6
AM-9041	Crew	Renumber Schedules and Files to database menu now allows selection of <i>e</i> , <i>f</i> , <i>o</i> , and <i>a</i> schedule books for renumbering.	24.3.6
AM-9035	Roster	Fixed an issue preventing the Roster Planner from displaying roster day types in the day type selection list.	24.3.5
AM-8973	Crew	Fixed an issue where a RUNS-style Crew Optimisation job involving a variety of relief modes could cause a fatal error in some cases.	24.3.4
AM-8824, AM-8868	Crew, Reports	Fixed an issue the Staff Car Graph Segment Report where the car requirements and summary would report incorrect numbers.	24.3.3
AM-8845	Fleet	Fixed an issue where the Optimiser in an EV Fleet Job would at times produce a result violating the minimum State of Charge.	24.3.2
