Roster

System Fixes

Ticket #	Comment
	Timesheet Duplications Deleting a parent line in the Timesheets will no longer cause a duplicate entry to be created
	Shift Sheet Tab The Shift Sheet tab was very slow in displaying information when selected. The loading time has been improved by removing the drop lists for the Node fields. To select a Node in one of the Node fields Alt-F is now used instead of a drop list.
	Employee Position in Roster Employees in a Roster doing work for another Depot were being displayed in the incorrect position in the Roster. This has been fixed.
	Austrics Import Routine An issue was discovered when incorrect Shift Sheet lines were being created when importing Shift data using the Austrics Import routine. This has been fixed.
	Roster Public Holiday Shifts It is now possible to move in bulk all working shifts from the Roster on a Public Holiday to the Scratchpad to make it easier to reassign the Public Holiday working shifts.

Enhancements

Ticket #	Comment
	Multi-Period Rostering New functionality in the Roster screen has been developed to enable the display of multiple periods in the one Roster screen. There is a new setting in the Roster Control information to allow the setting of how many periods should be displayed (up to maximum of 6 periods)

Despatch

System Fixes

Ticket #	Comment
	Driver Showing as Late Signing on When Absent An issue was raised where when a driver was marked absent for a second piece of a Shift that required a Sign On was still shown as Late signing on for that work. This has been fixed.

Ticket #	Comment
	Setting Timesheets from Despatch The drivers pay department will now change appropriately when setting Timesheets from the Despatch screen
	Setting Timesheets from Despatch When a Reason has been added to a Despatch Shift Sheet this will now flow to Timesheets when they are set from the Despatch screen. The Reason needs to be entered on the first line of a Day Type block for this to occur.

Enhancements

Ticket #	Comment
	Bulk Printing of Driver Shift Sheets It is no possible to print all Driver Shift Sheets for a day.

Charter

System Fixes

Ticket #	Comment
	Incorrect Charter Calendar Counts Invoiced Charter Trips were being displayed as still to invoice in the Charter Calendar. This has been fixed.
	Charter Sales Analysis by Type Report (No Despatch) The performance of this report has been improved.

TIMS Tablet (Operations)

System Fixes

Ticket #	Comment
	Last Checked Date/Time for a Vehicle The last time a PTI check for a vehicle was done was not being displayed in the TIMS Tablet. This has been fixed.
