# TIMS 25.3.9

## Tweaks and Fixes

**Charter**
- Changed Set Timesheets form the Charter Allocation screen to use the Working Depot, not the Owning Depot.

**Day of Operations**
- Fixed an issue with buses being removed from the Yard Plan when multiple Users have the Yard Plan open at the same time.

**Inventory**
- Fixed an issue with incorrect Warehouse and Legal Entity being applied when using Suggested Re-Orders.

**Payroll**
- Fixed an issue with calculating pays causing an incorrect Shift Spread decrement calculation being incorrect.

**Roster**
- Fixed an issue with incorrect Fatigue results being calculated when the Roster is regenerated using a different Duty Template.
- Fixed an issue that occurs occasionally with Shifts in Operations Screen being duplicated when Timesheets are generated.

**Workshop**
- Fixed an issue with creating a Defect from a Workorder.
- Fixed an issue with the Workshop Schedule quick buttons stopping functioning.
- Fixed an issue with Service Templates displaying Item IDs instead of Item Codes.
