

# TIMS

## Patch Notes

### TIMS 25.2.14

#### Tweaks and Fixes

##### Day of Operations

- Fixed an issue when Timesheets set from Despatch wasn't picking up SignOn and SignOff times.

##### Employee Web Roster

- Improved display of work with multiple Day Types.

##### Fatigue

- Fixed Night Rest Break calculations after an extended non-working period.

##### Payroll

- Fixed an issue with Payroll posting an unbalanced Journal for Workers Compensation.
- Fixed an issue with the ABN number in the Employee file not being saved.

##### Roster

- Fixed an issue with the Scratchpad through all Shifts under certain scenarios.
- Fixed an issue with generating Timesheets using Republish Modified Rosters.
- Fixed an issue with correct Shifts not being used in the Roster when a replacement Shift Book is used.

##### TIMS Tablet

- Pre-Trip inspections done in Workshop no longer redirect to Defects after creation.
- Fixed a Stocktake issue when entered count quantities are not displayed or refreshed.

##### Workshop

- Fixed various issues with Workorders being duplicated and missing in the Service Calendar.
- Improvements and fixes to new version Fuel Loaders.

##### Workshop Touch

- Fixed an issue with Workshop Touch crashing intermittently with General Protection Faults.
