## Release Notes

### System Tweaks and Fixes

- Resolved an issue causing faults without sub-types to not appear in the workshop tab
- Tweaked the 'Set Timesheets from Charter Allocation' functionality to accurately order the timesheet lines by time
- Tweaked the way Chart Trips are cancelled to resolve an intermittent issue relating to the additional billing lines being created
- Tweaked the new employee form to populate the legal entity by default
- Resolved an issue in performance monitoring that was causing the disciplinary count to not appear
- Locked down charter invoices so they cannot be deleted or altered after printing/emailing
- Fixed an issue in the Debtor Ageing Summary report that was causing some values to appear as 0
- NZ Bus only - Updates to the Esker API relating to PO header, PO items, and vendor data feed

### Technical uplift

- Java dependency updates
- ODBX Driver update
- JavaScript dependency update

## Release Notes

### What's coming in TIMS 25.3?

#### Timesheet Approval Functionality

- New functionality to support your timesheet approval process. This feature will enable the time sheet approvers to review and approve timesheet lines, ensuring that approved entries remain unchanged without their notice or approval.

#### Shift Sheet Enhancements

- A collection of enhancements for the TIMS Shift Sheet to improve general usability for the day of operations users.
