TIMS 25.2.6 Patch Highlights

System Tweaks and Fixes

Roster

- License expiry dates are displayed correctly when viewing more than on period.
- An error that can occur when loading shifts to the Scratchpad from the Duty Template has been fixed.
- User defined notes for an Austrics import are now restricted to 128 characters.

Driver Touch Kiosk

- Employees can no longer bypass Sign On questions by swiping their card again.

Web Services API

- Company ID validation has been fixed in login function.

Payroll

- Superannuation for Under 18's is now calculating correctly.
- Quarterly Super Cap is now based on Envelope Date, nor Pay Period Date.
- A Termination Transaction now removes the Active Flag for employees.
- Posting Payroll transactions to Inactive accounts no longer occurs.
