

## Fleet Manager

### System Fixes

Ticket #	Comment
	<p><b>Model copy option</b></p> <p>Previously when copying a model all fields would copy except Manufacturer, which would populate with the first manufacturer. Now the Model will copy all fields</p>

### Enhancements

Ticket #	Comment
TAP-	<p><b>Driver Tablet – Pre Inspection Defects</b></p> <p>Defects recorded by the Driver tablet were recording 0.00hrs for the time ignoring the Control Information Defect standard time. This has now been updated, defects will now be consistent no matter who reports the fault.</p> <p><b>Defects can have their own time</b></p> <p>In Control information there is a standard time for all defects. There is now an option to add time to particular defects which can be different to the standard, eg Flat Tyre 0.xhr, this will then display in the service calendar with the more accurate time.</p> <p>Ensure Defects have a Defect Service – it is the service that gives the line on the work order.</p>
