

## Fleet Manager

### System Fixes

Ticket #	Comment
TAP-	<p><b>Subcontractor not displaying if it is on a Carryover line</b></p> <p>If a subcontractor is allocated to the work order, when the work order carried over to the next day, the column in Service Calendar lost the Subcontractor. This now displays the Subcontractor in the column no matter how many days it is carried over.</p>

### Enhancements

Ticket #	Comment
TAP-	<p><b>Workshop Tablet</b></p> <p>The workshop tablet application only works in portrait mode. This now has the functionality to be viewed in both landscape and portrait modes.</p>

## Purchase Orders

### System Fixes

Ticket #	Comment
TAP-95169	<p><b>Miscellaneous items added at receiving.</b></p> <p>If a non-tracked item was added to a receiving that was not on the purchase order and was copied from the line above. This would give a walk back error but could still save, if the error message was ignored, this caused the receiving to go out of balance. Copying a non-tracked item more than once can now be done without a walkback error.</p>
