Fleet Manager

System Fixes

Ticket #	Comment
TAP-90525	**Creating a Defect from the Workshop Touch** When creating a defect from the Home Page of the Workshop Touch, this was previous holding the Work Order previously work carried out. Creating a defect from the Home Page will not link to a Parent Work Order.
TAP-92735/92016	**Reinstate Fleet Manager > Service Calendar – Quick Fix** Work Type, when selecting a different Work Type was not holding and posting. This has now been resolved

Purchase Orders

System Fixes

Ticket #	Comment
TAP-	**Work Order added at the Receiving the Plant would not display** When processing a Receiving and adding a work order to a line the Plant was not auto populating (like in Purchase Orders), this had to be manually typed into the receiving if it was missed at the receiving stage and the work order was still unposted, the work order could not be posted.

Enhancements
